DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,702,636. This is a double patenting rejection.

Claim 1 of the present application claims a method of manufacturing an image display device

Claim 1 of prior U.S. Patent No. 6,702,636 claims the same method of manufacturing an image display device.

The only difference between the claims resides in phrasing which does not change the patentable subject matter of the claims. The differences are detailed below.

Claim 1 of the present application recites:

"A method of manufacturing an image display device comprising" in lines 1-2.

Claim 1 of prior U.S. Patent No. 6,702,636 recites:

"A method of manufacturing an image display device comprising the steps of:" in lines 1-2.

Claim 1 of the present application recites:

"the processing in each of the plurality of processing chambers is performed" in lines 8-9.

Claim 1 of prior U.S. Patent No. 6,702,636 recites:

"performing the processing in each of the plurality of processing chambers" in lines 13-14.

Claim 1 of the present application and claim 1 of prior U.S. Patent No. 6,702,636 are virtually identical, with the exception of these above-detailed phrasing differences. Therefore they are directed to the same invention.
